ENGINEERING PROFILE

Product-minded Full-Stack Developer with real-world experience building operational SaaS platforms, financial ledgers, and event systems. Focus on double-entry accounting, FIFO batch management, and atomic data integrity.

PRODUCTION WORK & FEATURED SYSTEMS

Bharat Enterprise - Billing & Business Operations SaaS (Dec 2025 - Present | Real-World Product)

Role: Independent Full-Stack Developer | Live: <https://billing-software-sigma.vercel.app/> | GitHub: [subhankar-das-phantom/Billing-Software](https://github.com/subhankar-das-phantom/Billing-Software)

- Independently designed and shipped full-stack SaaS originating from active pharmaceutical distributor workflow.
- Dual-entry chronological customer ledger, eliminating balance drift across multi-year transactions.
- Automated FIFO lot-tracking ledger sorting batches by expiry date, preventing near-expiry fulfillment errors.
- Engineered aggregation pipelines reducing ledger report transmission payload from 2.3 MB down to ~5 KB.
- Compound indexing slashed cold-start reconciliation queries from 128.38 ms to 34.64 ms (~73% faster).

Accountly - Financial Transparency for Shared Contributions (2024 | Independent Project)

Role: Lead Full-Stack Developer | Live: <https://accountly-phi.vercel.app/> | GitHub: [subhankar-das-phantom/Accountly](https://github.com/subhankar-das-phantom/Accountly)

- Multi-member pooled contribution management with public-facing read-only audit portals.
- Immutable append-only transaction ledger with cryptographic checksums and receipt verification.

Personal Finance Tracker (Sep 2025 - Nov 2025 (Ongoing Updates) | Personal Project)

Role: Full-Stack Developer | Live: <https://personal-finance-tracker-black-pi.vercel.app/> | GitHub: [subhankar-das-phantom/personal-finance-tracker](https://github.com/subhankar-das-phantom/personal-finance-tracker)

- Built out of daily necessity: expense categorization, monthly budget constraints, and bidirectional Excel data sync.

EVORA - Event Discovery & Reservation Platform (May 2026 - Aug 2026 | Academic Project)

Role: Full-Stack Engineer & Team Lead | Live: <https://evora-drab.vercel.app/> | GitHub: [subhankar-das-phantom/Evora](https://github.com/subhankar-das-phantom/Evora)

- Academic capstone implementing optimistic locking for atomic seat reservations and QR ticket verification.

EDUCATION & ACADEMICS

RICIS Institutions - Bachelor of Computer Applications (BCA Hons.) | 2024 - 2027 Planned Path

Simple average of completed SGPAs: 8.79 (not university-issued CGPA) | Sem I: 8.50, Sem II: 9.10, Sem III: 8.77

Coursework: Data Structures, DBMS, Operating Systems, Networks, C/C++, Core Java, Web Architecture

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C++, SQL, HTML5, CSS3

Frontend: React, Next.js, TypeScript, Tailwind CSS, Material UI, Vite

Backend: Node.js, Express, REST APIs, JWT, Server-Sent Events (SSE)

Databases: MongoDB, Mongoose, Aggregation Pipelines, Transactions, MySQL

Infrastructure & Tools: Docker, Git, GitHub, Postman, Vercel, Render

Architecture & Systems: Double-Entry Ledgers, FIFO Lot Tracking, Multi-Tenancy, RBAC, Idempotency
