PROFILE

3rd-year BCA (Hons.) student and independent full-stack developer who builds and maintains real-world software products. Developed Bharat Enterprise, a billing and business-operations SaaS originating from a pharmaceutical distributor workflow; the first real user adopted it during active development, and later product decisions were driven by actual usage and feedback.

FEATURED PRODUCT EXPERIENCE

Bharat Enterprise - Billing & Business Operations SaaS | Independent Full-Stack Developer | Dec 2025 - Present

React, Node.js, Express, MongoDB, TypeScript, Tailwind CSS, JWT, RBAC, multi-tenancy, SSE, Razorpay

- Built and evolved a production-deployed business platform covering invoicing, payments, GST, customer ledgers, collections, purchasing, inventory, batch/FIFO stock allocation, analytics and employee workflows.
- Reduced ageing-report payload size from 2.3 MB to ~5 KB (~99.8%) and improved a cold-start ledger query from 128.38 ms to 34.64 ms (~73% faster) through aggregation, projection, indexing and bounded queries.
- Implemented transactional financial/inventory workflows with MongoDB sessions, atomic stock deltas, tenant-scoped access, idempotent invoice creation and granular backend-enforced RBAC.
- Expanded the app into a subscription SaaS with plan-based access and Razorpay integration; released continuously through v2.x with production fixes, refactors, migrations, security and performance work.

SELECTED PROJECTS

Accountly

Financial transparency & contribution platform. Adapted from a personal finance workflow for a real shared-contribution use case; organizations/workspaces, public transparency, RBAC, audit logs and PDF/Excel reporting.

[GitHub](#) [Live](#)

Personal Finance Tracker

Personal finance application with JWT auth, budgets, category/monthly analytics, PDF reports, Excel import/export, validation, Helmet/rate limiting and virtualized large-data views.

[GitHub](#) [Live](#)

EVORA

Academic event-management platform with event discovery, bookings, admin workflows, role-based access, QR tickets and atomic seat allocation.

[GitHub](#) [Live](#)

Portfolio focus

Full-stack product engineering: real users, iterative releases, security, data integrity, performance optimization and SaaS-oriented architecture.

EDUCATION & ACADEMICS

Bachelor of Computer Applications (BCA Hons.)

RICIS Institutions, Andal | 2024 - 2027 (planned exit)
SGPA: Sem 1 - 8.50 | Sem 2 - 9.10 | Sem 3 - 8.77 | Sem 4 - Result awaited | Sem 5 - Ongoing
Relevant coursework: Data Structures & Algorithms, Web Design, C/C++, DBMS, Operating Systems, Networks, Java, Microprocessor & Computer Architecture.

Senior Secondary (XII), CBSE

Gyan Bharati School, Raniganj | Science | 70%

TECHNICAL SKILLS

Languages: JavaScript, Python, C, C++ **Frontend:** React.js, Next.js, Tailwind CSS, Material-UI, Recharts, EJS **Backend:** Node.js, Express.js, REST APIs, JWT, bcrypt, SSE **Data & Engineering:** MongoDB, Mongoose, MySQL, Transactions, Aggregation, RBAC, Multi-tenancy, API Security, Git/GitHub, PDFKit

CERTIFICATIONS & ACTIVITIES

Cyber Security Seminar - TDO Tech Education Pvt. Ltd. (2025) | IBM IT Fundamentals - Anudip Foundation (2024-25) | Competitive Arm Wrestling
